DETAILED ACTION

Claim Rejections – 35 USC § 102/103

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 8-10 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Hollingsworth (US 5,759,745).

Hollingsworth teaches a method of forming a hydrogenated amorphous silicon layer (Abstract and column 2, lines 48-55), which succeeds at disclosing a final composition corresponding to that claimed by applicants.

It is noted that the reference fails to disclose the same method of making limitations. However, applicant's claims are considered to be product by process claim. Applicant's final composition does not distinguish over the cited reference because it has been held that patentability is based on the final composition and not the method by which it was made. See In re Thorpe, 777 F.2d 695, 227 USPQ 964, 966 (Fed. Cir. 1985) and In re Marosi, 218 USPQ (Fed. Cir. 1983).

Applicant has not shown that the final composition differs from that of the applied method.

Allowable Subject Matter

4. Claims 1-7 and 9-19 are allowed. The following is an examiner's statement of reasons for allowance: Although applicant's admitted prior art teaches illuminating an amorphous silicon film with light results in forming a light damaged region, Hollingsworth (US 5,759,745) fails to teach illuminating an amorphous silicon film with blue or UV light to form a stabilized region.
